

# WM PIPE, INC

Delivering Reliable, High Quality  
Service with Efficiency & Integrity

# About WM Pipe, Inc.

Founded in 2000 by Dr. Michael Ogashi, WM Pipe, Inc. has grown into a trusted partner for the energy and construction industries, delivering comprehensive products and services across the project lifecycle. From initial consulting to final construction and acceptance, we are committed to meeting your mission requirements at every stage.

We pride ourselves on providing **scalable, cost-efficient, and sustainable solutions**. Our team of experienced engineers, supervisors, and personnel brings a wealth of expertise to every project, ensuring that your needs are met with precision and professionalism.

## Our Services

WM Pipe, Inc. specializes in supporting the **upstream oil and gas industry** throughout the entire life cycle of a reservoir. We help our clients at every stage—from locating hydrocarbons and managing geological data to well construction, formation evaluation, and optimizing production through the life of the field.

Our extensive inventory includes **industry-standard pipes** and **drilling components of all sizes**, and our strategically located warehouses ensure that we can fulfill customer orders with speed and accuracy.

We also offer a full range of services for the **marine / construction industry**, including pipe spool fabrication, outfitting steel items, primary structural fabrication, steelwork / pipe examination, abrasive / hydro blasting and painting and civil works. By closely collaborating with our clients and leveraging our in-house research facilities, we develop innovative, practical, and cost-effective solutions tailored to address even the most complex challenges.

## Logistics & Heavy Haul Services

WM Pipe, Inc. excels in managing both **domestic and international logistics**, offering end-to-end transportation, heavy haul, and shipment coordination. With over 20 years of experience, we can handle large volumes of shipments, manage multiple locations, and meet tight deadlines, all while ensuring compliance with safety and regulatory requirements.

Our heavy haul expertise includes managing **permits, safety protocols, and specialized equipment**, ensuring that every delivery is completed on time and in compliance with industry standards. By outsourcing your logistics functions to us, you can streamline operations, reduce costs, and focus on your core business.

## Why Choose WM Pipe, Inc.?

- » **Expertise:** Over 20 years of experience in the oil and gas industry.
- » **Comprehensive Solutions:** From consulting and engineering to construction and logistics.
- » **Flexibility:** Tailored services to meet your specific needs.
- » **Efficiency:** Large-scale inventory and logistics management to maximize cost savings.

At WM Pipe, Inc., we are more than just a service provider—we are your dedicated partner in driving efficiency, safety, and success across every phase of your project.

# WM Pipe, Inc. Services

WM Pipe, Inc. is an independent oil and gas company with over 20 years of experience, offering a wide range of pipes and drilling components. We provide efficient domestic and international shipping, complex logistics coordination, and 173 acres of pipe storage with 1,400 racks, delivering value-added services to meet customer needs.

- » Pipe Inspection & Maintenance
- » VTI Clean & Re-Dope
- » Full Length Drifting
- » Marking Removal & Re-Stenciling
- » Sand Blasting, Painting & Fabrication
- » Thread Gauging & Repair
- » UT Inspection
- » ID Grinding, Rattling & Waterblast
- » Bundling, Sorting & Packing
- » Inspection Monitoring
- » Brush, Roll & Spray
- » Pipe Cleaning & Reconditioning
- » Hydro Static Pressure Testing
- » Pipe Straightening
- » Dent Removal
- » Machine Beveling
- » Chloride Remediation (saltwater cure)
- » Torch/ Plasma Beveling
- » OD/ ID Defect Removal & Prove-up
- » Direct Vessel Discharge
- » Reliable Inventory
- » Portable Brush Machine

## **HEAVY HAUL**

We specialize in delivering top-tier heavy haul transportation services, ensuring every detail is meticulously managed—from permits and safety to the right equipment. The high expectations of our customers drive us to continually exceed their goals, inspiring us to maintain the highest standards in our heavy haul services.

## **STORAGE**

We offer tailored warehousing solutions for businesses of all sizes, from small and mid-sized enterprises to large corporations and international firms. Our flexible supply chain services enable companies to focus on their core competencies while enhancing their competitiveness in the global marketplace. By outsourcing to WM Pipe, Inc., clients gain scalability, cost savings, reduced liabilities, and faster time-to-market across multiple countries.

## **ABRASIVE BLASTING & COATING**

WM Pipe Inc. delivers exceptional craftsmanship, advanced application techniques, and premium materials. We provide a wide range of surface cleaning solutions and cutting-edge technologies, tailored to meet the needs of both commercial and industrial applications.

# LOGISTICS & TRANSPORT

**WM Pipe Freight Services, Inc.** is committed to enhancing efficiency and reducing costs for our clients. With flexible service options, we tailor our solutions to meet each client's unique needs. By outsourcing logistics functions, businesses can redirect valuable resources toward their core operations. Choosing the right distribution channel and delivery system involves not only evaluating sales and marketing strategies but also addressing critical logistical concerns such as sourcing, production, warehousing, inventory management, and final delivery.

At WM Pipe, we leverage client data, our deep expertise in service performance, and advanced software tools to design a customized logistics strategy that aligns with your goals. Our solutions are designed to ensure that finished goods are delivered to customers seamlessly, all while keeping business objectives and customer requirements in focus.

In a short period of time, our solutions can deliver the following outcomes:

- » **Develop long-term strategies** to align physical distribution systems with corporate and marketing objectives, including optimal staffing and performance targets.
- » **Benchmark current productivity and costs** through comprehensive physical distribution cost audits.
- » **Achieve transportation cost reductions** by leveraging consolidation, rate negotiation, private and contract carriage, and mode analysis.

**Our team members are always available to provide customized solutions for your unique challenges.**

# ENGINEERING

**WM Pipe, Inc.** provides comprehensive engineering services covering every phase of project development, from initial design through to final production. Our engineering scope includes the following key activities:

- » **Class and/or agency approvals.**
- » **Basic Design:** Including line layouts, general arrangements (GA), contract specifications, and basic calculations.
- » **Detailed Design:** Complete design documentation, including structural drawings, piping diagrams, electrical diagrams, outfitting arrangements, accommodation layouts, and purchase order specifications for all equipment.
- » **Transmittal Documents** for Request for Comments (RFC) drawings.
- » **Production Design:** All working standards, cutting drawings, bending & hot forming drawings, steel purchase order requisitions (POR), fabrication drawings, installation drawings, and PORs for manufactured items and installation materials.
- » **Production Methodology Drawings:** Including construction details, lifting and erection plans, accuracy check standards, and related check drawings.
- » **3D Modeling** for all components. Our end-to-end engineering services ensure seamless integration and efficient project execution at every stage.

# CONSTRUCTION

**WM Pipe, Inc. Construction Division** is a diversified heavy marine and civil contractor with extensive experience across the power, oil, gas, civil, and offshore industries.

As a multi-disciplinary specialty contractor, **WM Pipe, Inc.** specializes in the installation of foundations to support heavy rotating equipment in sectors such as automotive manufacturing, chemical processing, steel mills, and power plants. Additionally, we self-perform structural steel fabrication, erection, and equipment installation. These services are typically provided under the role of a subcontractor working alongside a general contractor.

When acting as a general contractor, **WM Pipe, Inc.** not only performs its specialty services but also manages subcontractors for other key trades, including electrical, mechanical, structural, and piping installations

#### **Additional Services Include Abrasive / Hydro Blasting and Coating**

- » - Abrasive / Hydro Blasting
- » - Apply Approved Coatings by Hand Mechanical
- » - Spray & Wrap Applications
- » - Internal Pipe Coatings
- » - Tank Coatings & Liners
